

# SANITISE Ireland

ENSURING A **SANITISED ENVIRONMENT**

We use a unique to market, multiple environment cleaner disinfectant which has achieved significant independent certification to date which include a Log 8 rate for MRSA in 30 seconds which is effective for up to 72 hours in an active biofilm when dry. However for optimal protection and bioactivity we recommend a 12 hour cleaning interval.

We are the most comprehensive and rapid solution for sanitising all environments and have access to one of the best antimicrobial cleaners on the market.
